

X — 5-Day Posting Schedule

Eastern Time (ET) · Character Counts Verified — Body + Hashtags Combined

15 posts · 5 threads · Every tweet verified under 280 chars including hashtags

HOW X CHARACTER COUNTING WORKS

- Every character counts** Letters, spaces, punctuation, emoji, hashtags, newlines — all count toward 280.
- URLs = 23 chars always** X shortens every URL to a t.co link counted as exactly 23 characters. So 'safeneighbor.us' counts as 23, not 15.
- Emoji = 2 chars each** Most emoji count as 2 characters due to Unicode encoding.
- Hashtags in threads** Put hashtags only on the LAST tweet of a thread. This saves ~60 characters on every earlier tweet.
- Counts in this PDF** Every tweet box below shows TOTAL (body + hashtags combined). This is the real number X will display.
