Emergency Mode. One tap.

When a law enforcement encounter happens, most people freeze — not because they're afraid, but because they were never taught what to say.

SafeNeighbor's Emergency Mode walks you through it: guided scripts, calm language, step by step. Exactly what to say. Exactly when to say it.

No panic required. Free at safeneighbor.us

Who taught you your rights?

For most people — nobody did.

That's not a personal failure. It's a systemic gap. Rights education doesn't reach the places it's needed most — in plain language, offline, in the moment.

SafeNeighbor fills that gap. Free. No sign-up. Works without a signal.

Share it with someone who could use it.

9:00 AM **Instagram** *Know Your Rights*

Three sentences. Every encounter.

"Am I being detained?"

"Am I free to go?"

"I do not consent to searches."

That's it. You don't need a law degree. You don't need to explain yourself. You just need to know these three sentences and say them calmly.

SafeNeighbor puts them in your pocket — with guided scripts for what comes next.

Your recordings belong to you.

SafeNeighbor's Evidence Vault keeps everything on your device — encrypted, PIN-protected, and completely inaccessible to us. We built it that way on purpose.

If your documentation of an encounter ever became legally significant, a subpoena to SafeNeighbor would return nothing. We'd have nothing to give. That's the point.

Document what happens. Protect what you capture. Keep it yours.
